As a busy homeschool parent, convenience and value are both important to you! You want to have everything your student needs to complete the projects in the text, but you want to stretch your dollars, too! That’s why Creation Sensation has prepared the Exploring Creation with Astronomy Priority Lab Supply Kit. Now you can combine the convenience of a pre-made science kit with the budget-friendly advantage of allowing you to provide the common, inexpensive items you probably already have in your home. Putting together everything your student needs to successfully complete the projects in the book Exploring Creation with Astronomy is now quick and easy!

*Actually, there IS one simpler solution. Creation Sensation also makes DELUXE Family Supply Kits which contain pretty much EVERYTHING your student needs to complete all the projects in an Elementary Apologia text. For more information contact us by phone, mail, or consult our website.

**Time-saving BONUS!!**

Inside of the kit you will find a detailed shopping list loaded with buying tips. You can quickly read over the list and if you already have these common items in your home, then your student is ready to go! But if you don’t, just take the list with you to the nearest Wal-mart Supercenter or similar store of your choice. Once there, you can follow the instructions on the list and quickly move through the store, easily finding any additional items your student might need. That’s right, everything on the shopping list can be found in one location, your local Wal-mart Supercenter! We have also included buying tips so you can make sure you get the right size and quantity the first time!

What could be simpler?*
Walmart Shopping List

**Office/Stationary Department**
- Scissors
- Thumbtacks (buy these only if you will be hanging up the balloon solar system made in Lesson One.
- Set of colored markers. Markers with permanent ink work best in both the projects in which markers are used.
- A permanent marker. If the set of markers (above) is of permanent ink, you do not need this additional marker.
- Tape - One roll of a clear ½" tape like Scotch® brand tape.
- A large rubber band. It needs to be long enough to stretch around a shoebox without breaking.

**Craft/Sewing Department**
- Thread or string or clear fishing line or anything else that will suspend balloons from the ceiling if you wish to display the model solar system from Lesson One. Do not buy this if you are not planning on hanging up the balloons.
- Steel needle. This is used several times to poke tiny holes. It also must be able to be magnetized (steel).
- Any porous fabric through which a bamboo skewer can be inserted, but through which you cannot easily see. Quilt batting works well, as does a loose knit. Some fabric centers will give you a free sample if you ask.
- Plaster of Paris. The smallest size container, approximately 3 - 5 lbs., will be sufficient.

**Hardware Department**
- A roll of black electrical tape, or gray duct tape. Either tape will work fine.
- Eye protection. Purchase inexpensive plastic goggles in the Hardware or Sports Department.

**Grocery Department**
- Flour. You will use a total of approximately 3 cups of flour throughout the course.
- Salt. You will use a total of approximately ½ cup of salt throughout the course.
- Baking Soda. Used in the volcano project, make sure you have a full box because your child will want to do this project over and over!
- Vinegar. You will want to have plenty on hand so purchase a quart-sized, or larger container.
- Red food coloring. As an inexpensive alternative, substitute a packet of unsweetened Cherry Kool-aid®. Sprinkle the red powder into the vinegar until it turns a bright red.
- Cooking oil. You will use approximately one tablespoon of oil throughout the course. Any vegetable oil is suitable.
- A chocolate bar. A Hershey® bar is a good choice for the project.
- Butter or margarine. You will use approximately ¼ stick.

**Household Supplies Department**
- Plastic Wrap. A small amount is required, so purchase the smallest-sized box.
- Aluminum Foil. You will need no more than a square foot of foil.
- Liquid Dishwashing Detergent. You will need only a few drops.
- Ziplock® Freezer bags. Purchase a box of gallon bags and a box of pint or quart bags. Buy freezer bags.
- Matches. Only one match is used.

**PURCHASE IMMEDIATELY BEFORE LESSON 12**
- Your choice of ingredients for ice cream (whole milk, vanilla, powdered sugar). See Lesson 12 for specific suggestions.

**SAVE FROM THE TRASH**
- Empty 2-liter soda bottles. You will need two of them
- Empty clear glass or plastic jar. A pickle jar or peanut butter jar works well.
- A lid from a margarine tub, sour cream, cottage cheese, dip, or yogurt container, big enough to float a needle.
- A shoebox or similar box.

**Other items you will need that you should already have in your home:**
- A stove
- A saucepan
- A large plate
- A large baking pan
- A large bowl
- Pencil
- A small bowl
- Water/ Ice
- Newspaper (or any other kind of paper)
- A computer CD (compact disk)
- From Outside:
- Small rocks, sticks
